

WEEK-3 INTERNSHIP REPORT

Project Title

Global Supply Chain & Logistics Performance

Name: Naveen Kumar

Enrollment No: 24162171011

Branch: Computer Science & Engineering

June 2026

1 Introduction

The Global Supply Chain and Logistics Performance project focuses on analyzing supply chain operations, shipping performance, customer behavior, product demand, and logistics efficiency. The dataset contains information related to orders, customers, products, markets, shipping modes, profits, and delivery performance.

2 Objectives

- Understand the logistics dataset.
- Perform data cleaning and preprocessing.
- Analyze customer segments.
- Study shipping and delivery performance.
- Identify top-performing product categories.
- Generate insights using data visualization.

3 Dataset Description

The dataset contains approximately 180,519 records and 53 columns. It includes:

- Customer Information
- Product Information
- Order Details
- Shipping Details
- Market Information
- Sales and Profit Data

4 Data Cleaning

The following preprocessing steps were performed:

- Checked missing values.
- Removed duplicate records.
- Verified data types.
- Handled inconsistent entries.
- Prepared dataset for analysis.

5 Exploratory Data Analysis

5.1 Pie Chart 1: Delivery Status Distribution

Figure 1: Delivery Status Distribution

5.2 Pie Chart 2: Customer Segment Distribution

Figure 2: Customer Segment Distribution

5.3 Pie Chart 3: Shipping Mode Distribution

Figure 3: Shipping Mode Distribution

5.4 Pie Chart 4: Market Distribution

Figure 4: Market Distribution

5.5 Pie Chart 5: Product Category Distribution

Figure 5: Product Category Distribution

5.6 Bar Graph 1: Shipping Mode Usage

Figure 6: Shipping Mode Usage

5.7 Bar Graph 2: Customer Segment Orders

Figure 7: Customer Segment Orders

5.8 Bar Graph 3: Market-wise Orders

Figure 8: Market-wise Orders

5.9 Bar Graph 4: Product Category Orders

Figure 9: Product Category Orders

5.10 Bar Graph 5: Delivery Status Comparison

Figure 10: Delivery Status Comparison

6 Key Findings

1. Late deliveries are significantly high.
2. Standard Class is the most preferred shipping mode.
3. Consumer segment contributes the highest orders.
4. Corporate segment is the second largest customer group.
5. Home Office segment has the lowest share.
6. LATAM market records the highest order volume.
7. Europe contributes a large portion of sales.
8. Pacific Asia shows strong customer demand.
9. Cleats are the best-selling category.
10. Men's Footwear performs strongly.
11. Women's Apparel maintains high sales.
12. Indoor/Outdoor Games show consistent demand.
13. Total sales exceed \$36 million.
14. Overall profit remains positive.
15. Delivery risk remains a critical challenge.

7 Conclusion

The analysis of the Global Supply Chain and Logistics Performance dataset provided valuable insights into customer behavior, shipping performance, market trends, and product demand. The findings highlight areas where logistics operations can be improved, particularly in reducing late deliveries and optimizing shipping processes.
